

### Synonym

CD85J,LILRB1,CD85,ILT2,LIR1,MIR7

## Source

Biotinylated Human LILRB1 Protein, His, Avitag(CDJ-H82E8) is expressed from human 293 cells (HEK293). It contains AA Ala 23 - Thr 431 (Accession # Q8NHL6-1).

Predicted N-terminus: Ala 23

#### **Molecular Characterization**

LILRB1(Ala 23 - Thr 431)
Q8NHL6-1
Poly-his

This protein carries a polyhistidine tag at the C-terminus, followed by an Avi tag (Avitag<sup>TM</sup>)

The protein has a calculated MW of 48.2 kDa. The protein migrates as 52-64 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.

### Labeling

Biotinylation of this product is performed using Avitag<sup>TM</sup> technology. Briefly, the single lysine residue in the Avitag is enzymatically labeled with biotin.

## **Protein Ratio**

Passed as determined by the HABA assay / binding ELISA.

### Endotoxin

Less than 1.0 EU per µg by the LAL method.

## **Purity**

>95% as determined by SDS-PAGE.

>95% as determined by SEC-MALS.

### **Formulation**

Lyophilized from 0.22  $\mu m$  filtered solution in PBS, pH7.4 with trehalose as protectant.

Contact us for customized product form or formulation.

#### Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

## Storage

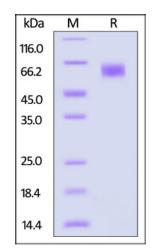

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

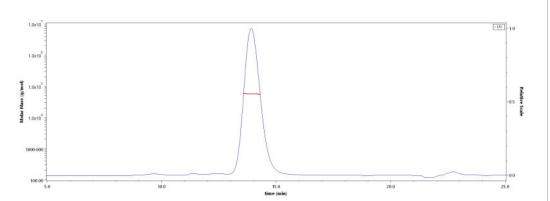

- -20°C to -70°C for 12 months in lyophilized state;
- -70°C for 3 months under sterile conditions after reconstitution.

# SDS-PAGE

Biotinylated Human LILRB1 Protein, His, Avitag on SDS-PAGE under reducing (R) condition. The gel was stained overnight with Coomassie Blue. The purity of the protein is greater than 95%.

## **SEC-MALS**

The purity of Biotinylated Human LILRB1 Protein, His, Avitag (Cat. No. CDJ-H82E8) is more than 95% and the molecular weight of this protein is around 50-65 kDa verified by SEC-MALS.

Report

## Background

# Biotinylated Human LILRB1 / CD85j / ILT2 Protein, His,Avitag™ (MALS verified)

Catalog # CDJ-H82E8

LILRB1 (Uniprot No. D9IDM8-1) is a variant that correlates with the low expression of LILRB1 on NK cells. It reflects the diversity of the LILRB1 locus and its influences on expression patterns on NK cells. LILRB1 belongs to the subfamily B class of LIR receptors which contain two or four extracellular immunoglobulin domains, a transmembrane domain, and two to four cytoplasmic immunoreceptor tyrosine-based inhibitory motifs (ITIMs). The receptor is expressed on immune cells where it binds to MHC class I molecules on antigen-presenting cells and transduces a negative signal that inhibits stimulation of an immune response. It is thought to control inflammatory responses and cytotoxicity to help focus the immune response and limit autoreactivity.

## **Clinical and Translational Updates**
