

Synonym

Delta3,delta-like 3 (Drosophila),delta-like protein 3,DLL3,Pudgy,SCDO1,SCDO1delta3

Source

Human DLL3 (353-492), His Tag(DL3-H52Ha) is expressed from human 293 cells (HEK293). It contains AA Arg 353 - Leu 492 (Accession # Q9NYJ7-1). Predicted N-terminus: Arg 353

Molecular Characterization

DLL3(Arg 353 - Leu 492) Q9NYJ7-1

This protein carries a polyhistidine tag at the C-terminus

The protein has a calculated MW of 16.4 kDa. The protein migrates as 18 kDa and 19-21 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.

Endotoxin

Less than 1.0 EU per µg by the LAL method.

Purity

>90% as determined by SDS-PAGE.

Formulation

Supplied as 0.2 µm filtered solution in PBS, pH7.4.

Contact us for customized product form or formulation.

Shipping

This product is supplied and shipped as sterile liquid solution with dry ice, please inquire the shipping cost.

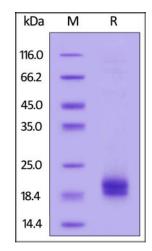

Storage

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- The product MUST be stored at -70°C or lower upon receipt;
- -70°C for 3 months under sterile conditions.

SDS-PAGE

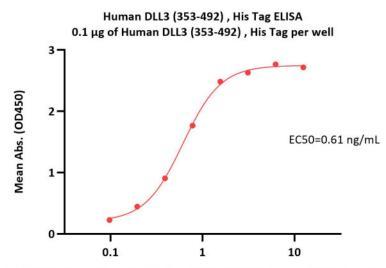

Human DLL3 (353-492), His Tag on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%.

Bioactivity-ELISA

Human DLL3 (353-492) Protein, His Tag

Catalog # DL3-H52Ha

Anti-DLL3 Antibody (specific Binding EGFs of DLL3), Human IgG1 Conc. (ng/mL)

Immobilized Human DLL3 (353-492) , His Tag (Cat. No. DL3-H52Ha) at 1 $\mu g/mL$ (100 $\mu L/well)$ can bind Anti-DLL3 Antibody (specific Binding EGFs of DLL3), Human IgG1 with a linear range of 0.1-2 ng/mL (QC tested).

Background

Delta-like protein 3 (DLL3) is a transmembrane protein that belongs to the Delta/Serrate/Lag-2 (DSL) family of Notch ligands. May be required to divert neurons along a specific differentiation pathway. Plays a role in the formation of somite boundaries during segmentation of the paraxial mesoderm. DLL3 protein is expressed on the surface of tumor cells but not in normal adult tissues.
